

## NET WASHER – the excellent alternative to manual cleaning

The Net Washer is made of stainless steel AISI 304 which ensures that it is very strong and highly resistant to corrosion. The net washer is designed for washing all net sizes and the water can be separated from the solids and recirculated several times which is very eco-friendly. The washing machine only requires a secure platform, is low in maintenance, very easy to operate and highly reliable for continuous performance. A competitive price, the environmental friendly impact and the saving in labor cost makes the net washing machine an excellent alternative to other cleaning methods.

- **Heavy duty washing drum machine**
